2014 Street Improvement Project CONSTRUCTION UPDATE

September 22, 2014 CONSTRUCTION UPDATE:

- The project includes Linden Avenue, Park Avenue, and parts of Division Street.
- **North Linden, South Linden, Park Avenue, and Division Street near Linden.** Concrete work and bituminous base paving has been completed. All underground work has been completed.
- The final lift of paving (the wear course) will not be installed until 2015 on Linden or Park. Because it's a County road, the wear paving has been installed on Division Street. Wright County is planning a pavement rehabilitation project for Division Street in 2015.
- **Topsoil and Seeding.** The topsoil and seeding will be completed by 9/23/14. The work included: preparation of the surfaces, placing 4-inches of screened topsoil in the areas between the curb and sidewalk, placing 1-inch of screened topsoil in disturbed areas behind the sidewalk, and hydromulch seeding all areas. **The Contractor will water until October 20th. Property owners will be responsible for seed/grass maintenance (which should include watering, weed removal, and touch-up) beyond October 20th.**
- **Division St. at Elm Avenue.** Replacement of old water main in the intersection of Elm Avenue is scheduled to be completed on September 23rd and 24th. This work will include temporary road closures and water system interruptions. Notices will be delivered to those properties that will experience water system interruptions.
- **Division Street and Oak Avenue Misc. Repairs.** The 2014 Street project includes miscellaneous sidewalk and curb repair work on Division St. and Oak Ave. This work is being completed in 2014 in anticipation of a Wright County paving project in 2015. The miscellaneous work on Division and Oak will be completed in September and October.

KEY PROJECT CONTACTS:

Steve LaTour LaTour Construction (Contractor)	(320) 963-5993	steve@latourconstruction.com
Harlan Olson City Field Const. Representative	(612) 961-5466	harlan.olson@stantec.com
