

## **Important Reminder: Do Not Flush Wet Wipes or Rags**

The City would like to remind all residents that wet wipes, cleaning wipes, paper towels, rags, and similar materials should never be flushed down toilets.

Even products labeled “flushable” do not break down like toilet paper and can cause serious problems in the sewer system. These items can clog household plumbing, damage sewer pumps, create costly backups, and lead to expensive repairs for the community.

To help protect our wastewater system:

- Only flush toilet paper and human waste
- Dispose of wipes, rags, paper towels, and hygiene products in the trash
- Never pour grease or oils down drains

Your cooperation helps keep our sewer system operating safely and efficiently while reducing maintenance costs for everyone.

Thank you for doing your part to protect our community infrastructure.
